

# Healthy Home

## Energy & Consulting, Inc.

*Protect ourselves  
Protect our customers*

*All of our work is aimed at creating a healthier home for you and your family!*

### **Healthy Home Company Daily Procedures**

- Each employee completes a daily health screening
- Maintain 6' social distance
- Wear face coverings
- Reduced number of employees working in office
- No more than 2 people in a vehicle at a time
  - *When in a vehicle with another person masks must be worn*
- Staggered team start times to reduce number of employees in office at any one time
- Wipe down commonly touched surfaces in office daily
  - *Including but not limited to; door knobs, handles and bannisters*
- Trucks and hand tools to be sanitized at the end of each day at the office with EPA Approved disinfectant.

### **Preventing Exposure**

- Prior to appointments Healthy Home checks with each homeowner if anyone in the home has shown any symptoms or has a fever
  - If they are showing symptoms Healthy Home reschedules for a minimum of 3 weeks later.
- We have a generous sick day policy such that no one working for Healthy Home will feel pressured to work if they have even the slightest indication of illness.
- Upon arrival and before departure of every home our team will wipe down commonly touched surfaces with EPA Approved disinfectant.
  - *Including but not limited to; door knobs, handles and bannisters*

### **Healthy Home In-Home Procedures**

*Our team has been trained and will be consistently following the below procedures:*

- Wash hands often
- Maintain 6' social distance
- Wear face covering at all times
- Wear gloves
  - *Per standard Healthy Home procedures, to ensure proper execution of improvements and health*
- Upon arrival and before departure of every home, our team will wipe down commonly touched surfaces with EPA Approved disinfectant.
  - *Including but not limited to; door knobs, handles and bannisters*
  - *Bathroom will be disinfected after each use. (Bathroom location to be approved by homeowner)*
- Follow CDC outlined personal protective equipment robing/disrobing procedures

### **When Completing a Remediation within a Home**

- Wear Tyvek™ suits inside of home's living space
- Utilize exterior accesses to get into workspaces and reduce time inside living space as much as possible
- Healthy Home Team Leader's will ensure the following is clear with homeowners;
  - *What spaces we plan to be in each day*
  - *What bathroom we can use during work*
  - *What paths we plan to take during our work*
